

SCHOOL OF EDUCATION

Education is the key to a more equitable and sustainable future, and UP's School of Education is dedicated to preparing professional educators with the skills to serve all learners.

EDUCATIONAL EXCELLENCE: All programs are nationally accredited by NCATE/CAEP, teacher education's highest level of distinction.

HANDS-ON EXPERIENCE: Students gain deep field experience starting in their first semester, accumulating more than 1,200 clinical hours in schools through our partnerships with more than 18 school systems.

EXPANDED CAREER PATHWAYS: Students are certified P-12 and can choose to focus on early childhood, elementary, middle school, or high school.

FORGE YOUR OWN EDUCATION PATH: Add a College of Arts & Sciences major or minor, learn an international language, study abroad, or earn an endorsement in ESOL, reading, or special education.

CAREER READY: All certification and testing requirements are built into the program so students earn their teaching license and are ready to lead their own classroom from the moment they graduate.

FAST-TRACK: Our 3+1 master of teaching degree, one of the first of its kind in the Pacific Northwest, allows students to graduate with a bachelor's and master's degree in Education in just four years.

FACULTY SUPPORT: Dedicated full-time faculty provide mentoring, networking, and strong recommendations to secure each student's first position. We approach 100% hire rate each year.

LIFELONG MENTORSHIP: Graduates become part of a strong alumni network that promotes professional development, mentoring, and connections between recent graduates and master teachers and leaders. We have alumni teaching in over 40 states and abroad.
