

COVID-19 Data - Spring 2022

(updated 05/09/2022)

Total Cases

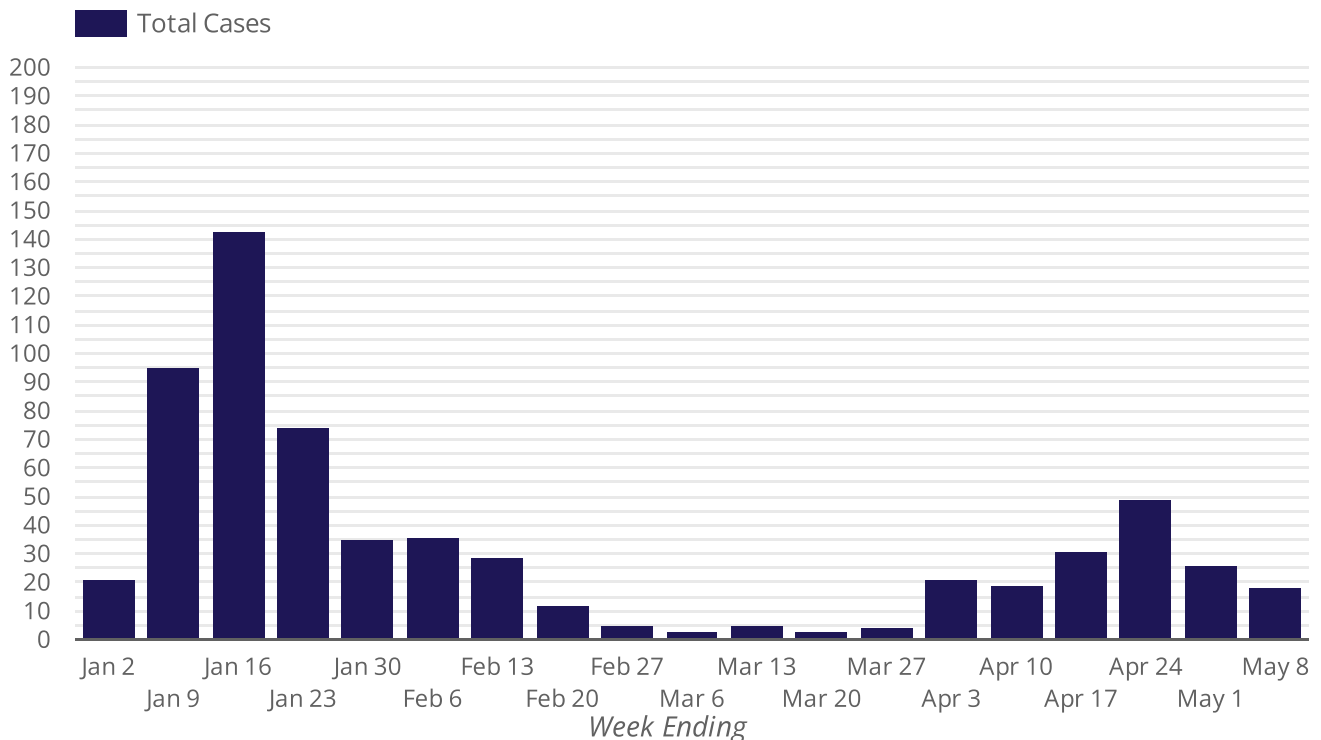

18

On Campus Isolation

1

Week Ending 05/08/22

New COVID-19 Positive Cases by week[^]

Spring Semester (starting 12/27/2021)

Total Cases

629

[^] Students and employees are instructed to report all positive cases to the University; reporting is limited to only known cases. The total for each week ends on Sunday and reflects COVID-19 positive cases through a weekly bar in the graph. The weekly number reported in the bar graph include all positive cases reported to University of Portland for members who are actively a member of our local campus community. On campus isolation numbers fluctuate throughout each day as students are moved into and cleared from isolation with the support of the case management team. The number reported here represents a snapshot of the number of students being supported in on-campus isolation as of Sunday of the reporting week. Post-arrival testing of students took place 01/12/22 - 01/14/22 and those numbers are included here.
