Tips for completing the survey

- *It is recommended that you complete the survey on a computer or tablet, not on a mobile device.*
- *Do not use double quotation marks (") in your survey responses.*
- *Press the "Save" button if you are going to start the survey and complete it at another time. There is a "Save" button on each tab of the survey. Saving the survey does not submit your answers. Your answers can be changed until the survey is submitted.*
- *The questionnaire will not be submitted until you click on "Submit" on the final page.*
- *You will know it has been submitted when you receive a message that states "Congratulations, your survey has been submitted"*
- *Make sure to navigate away from the final page. Close your browser once you have submitted the survey and received the survey complete message.*
